

THE GOVERNING BODY'S OBJECTIVES 2018-19

It is recommended that governors adopt the following objectives for 2018-19:

1. Committee and governing board chairmen proactively seek the information required from those responsible for action in order that it arrives in a timely way to ensure that the number of deferred items on committees are reduced and thus allow us to complete 95% of statutory tasks, 90% of recommended tasks and 90% of other tasks on time.
2. Improve our liaison with School Council by whatever measure is helpful for them and hold at least two meetings with council in the academic year if they regard this a supportive approach.
3. Proactively take play our part in achieving the 2018/19 school SIP objective of increasing the proportion of parents who complete the annual parents' survey who say they have sufficient information about the work of the governing body from 77% to at least 90%.

Our vision is to provide a superb village school, delivering a great education for all our children.

This policy was approved by the governing body on
