

Animals including humans 2

Careers linked to this topic
Animal care worker, Bee keeper,
Biologist, Dog groomer

Lesson 1 Learn how to order the stages of the human life cycle

What happens during a human's life?
Choose an animal and its suited habitat which incorporates everything needed for survival (using observations and ideas to answer questions)
Adult, life cycle, survive, independent, grow

Lesson 2 Describe the stages of life from adulthood to old age

What happens to humans as they get older?
Sorting what is and is not important for human survival (using observations and ideas to answer questions)
Womb, develop, helpless, toddler, foetus

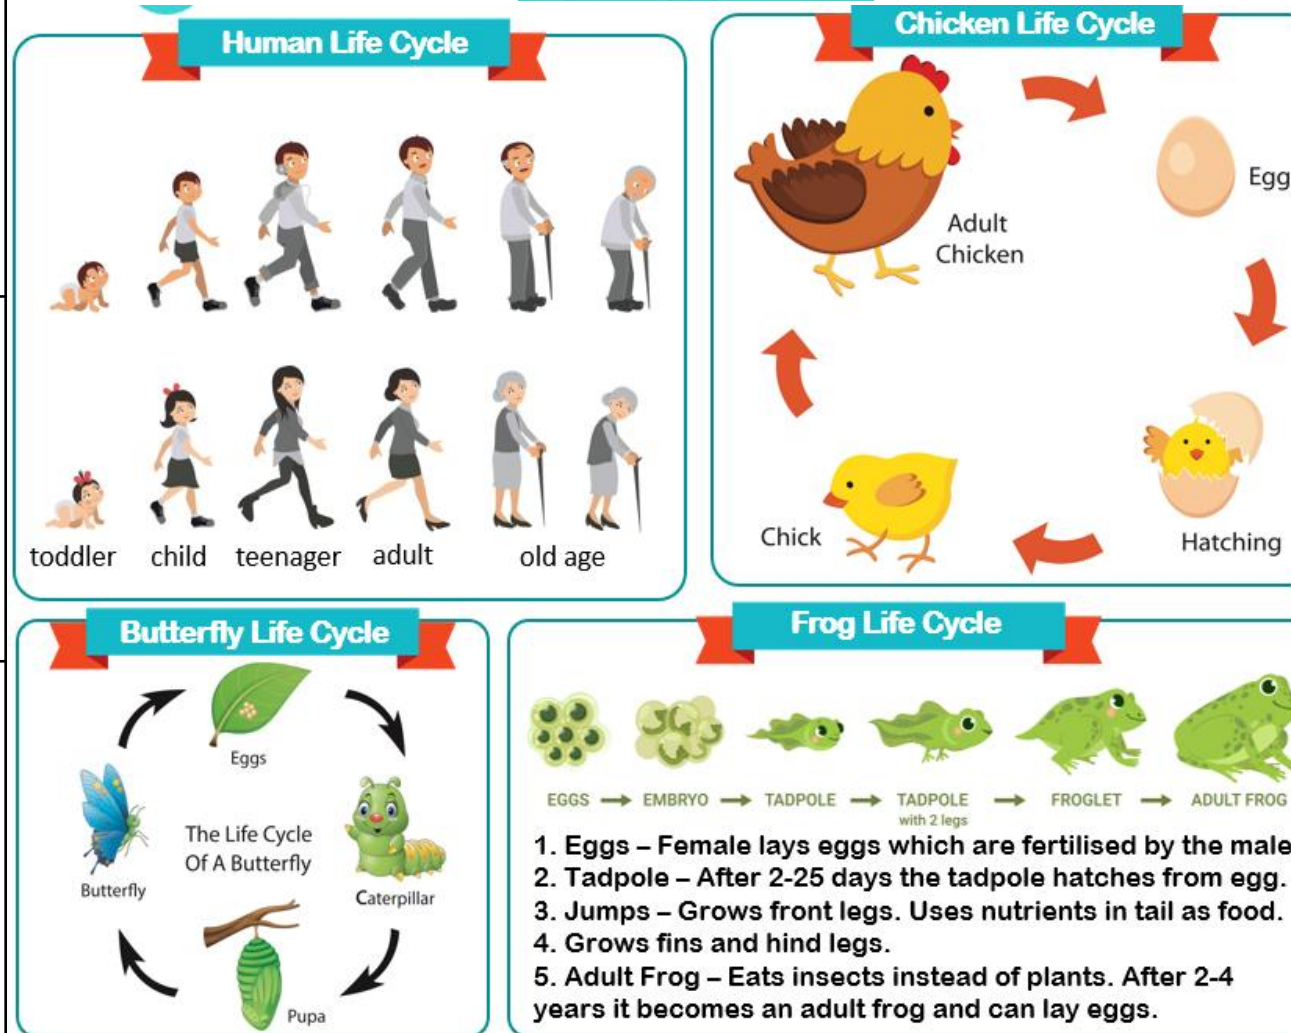

Lesson 3 Learn how to match offspring to their parent

What are the similarities and differences between parents and their offspring?
Sorting foods into the correct group on the food pyramid (identifying and classifying)
Differences, offspring, resemble, inherit, gene

What do animals (including humans) need to survive?

Year 2
Spring 1

Lesson 4 Explore the life cycle of a chicken

What changes happen during the life of a chicken?
Creating a healthy plate of food which incorporates a balance of the 5 food groups (using observations and ideas to answer questions)
Chick, predict, hatchling, bar chart, reproduction

Lesson 5 Describe the life cycle of a butterfly

What changes happen during the life of a butterfly?
Investigating the impact that exercise has on different parts of our bodies (using observations and ideas to answer questions, performing simple tests)
Transformation, chrysalis, caterpillar, metamorphosis, larva

Lesson 6 Explore the life cycle of a frog

What changes happen during the life of a frog?
Investigating the importance of a good hygiene routine (performing simple tests)
Frog, amphibian, froglet, frogspawn, tadpole
